LA HOME NEWS #2

Ateliers Zelij

Almost 20 years of creation for **Ateliers Zelij**! It was in 2003 in Toulouse that Delphine Laporte and Samir Mazer, created at the end of their training in Industrial Design, their first R&D workshop to experiment the materials with a subtle balance between design, art, and innovation. Through the zellige that offers nuances of infinite richness, Samir Mazer, the creative entity of the duo, pays tribute to its culture and this know-how by imagining new geometric trajectories. Daring to look like nothing, breaking codes, inventing a new language, and creating a unique aesthetic, for 20 years the brand has been constantly developing and innovating. Today Ateliers Zelij is an activity of manufacture and distribution of these incredible materials that are zellige, cement, stone, or Terrazzo, but above all a real design and creation studio that honors the know-how and the preservation of gestures and beautiful materials available to its clients through all types of projects. On the Paris Deco Home 2023 edition, Ateliers Zelij invites you to celebrate 20 years of creation, from 18 to 22 January.

Agrippa

The expression of beauty through the natural. Our goal has always been to maintain and grow a treasury of talent and ingenuity that allows for even expanding range of unique and inspired pieces. We are proud to work with emerging and consolidated designers and craftsmen to create a new generation of furniture art. We have taken our name from one of our most celebrated pieces as inspiration for our talent to organically grow the distinguished and distinctive style that we embody.

Marie Martin

We are very delighted to exhibit our colourful lighting and accessories collection at Paris deco Home!

Marie Martin is the youngest brand of the Lumière company, which has been designing and manufacturing luxury and exclusive lighting since 1964. Together with her good friend and interior designer Martin de Boer, Marielle de Graaf-Blok has developed an extravagant collection full of good and positive energy! "Less is bore" is the celebrated credo at Marie Martin. This reflects in the exuberant use of gold, animal prints and fringes. A shared passion for antiques, craft and "overflowing" decoration is translated into a colourful blend of "mix and match" patterns and materials. Lively, unique, warm, never boring but always stylish and a feast for the eyes. Down to the smallest details, a wonderful world is created that will never be boring. We look forward welcoming you in our pop-up store at 17 rue de Beaux-Arts!
